

HAMPTONS

Tossing an array of colorful throw pillows on the clean canvas of a sofa is an easy way to update your living room's look. "Pillows are the easiest way to spruce up a sofa," says interior designer and East Hamptonite Benjamin Cruz. "They can be used to add a pop of color, pattern, and texture or just as a fun accent that can give a sofa new life."

Here, the beautiful twists and turns of coral branches that have become and style to a beach house with an otherwise neutral color palette. Both Yves Delorme and English Country Antiques utilize striking colors—such as rich tangerine and aqua shades reminiscent of the pristine Atlantic Ocean—in their luxurious designs. "Coral design works so well in the Hamptons because it provides a seaside organic feel but can also look contemporary and even geometric," says Cruz. "It's a versatile look for a variety of styles." **H**
